SIO15 2024: Topic 20 - Wildfires

Cali Wildfires and Climate Change

- earlier spring/late fall
- longer dry season
- more wildfires

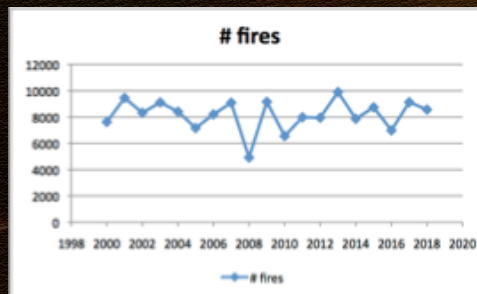

Santa Ana season
Sep – Feb (peaks Dec)

Peak of SoCal Fire Season:
OCTOBER

SIO15 2024: Topic 20 - Wildfires

Cali Fires since 2000

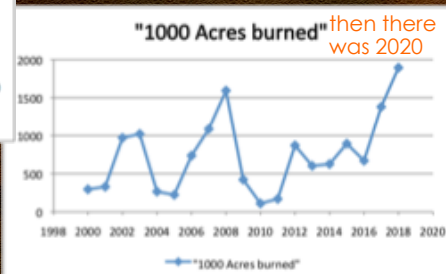

source: Wikipedia

single fires getting larger!!

- # fires steady
- but size of burned area increasing
- recent years exceptional in acreage?

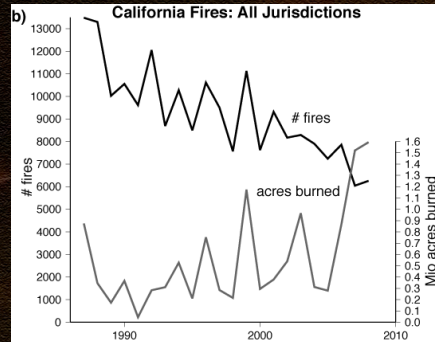

info difficult to get:
different fire agencies
CalFire/Feds have
different reporting

2019 0.3 M
2020 4.4 M
2021 2.6 M
2022 0.4 M

SIO15 2024: Topic 20 - Wildfires

Fire Suppression, Fire Fighting and the California Budget Crisis

- number of fires declining
- but size of burned area increasing

Cali (all jurisdictions):
less fires but larger!!

Fig 10.25b

- 2000, nearly 1/3 was prescribed
- prescribed fires can get out of control!!!!
- prescribed fires get more expensive!

2022 New Mexico
Apr-Aug (largest in
modern NM history)

does fire suppression increase
the risk of LARGE wildfires??

SIO15 2024: Topic 20 - Wildfires

2024 Wildfires – U.S.

to date:

CA nearly 1M acres
AK 6.6M acres
(701 fires, 426 human = 61%)

> 50k acre Fires in U.S. in 2024

Name	State	Acres	Start Date	Cause
Betty's Way	NE	68,000	Feb 26	
Smokehouse Creek	TX/OK	1,055,000	Feb 26	downed powerlines

as of 9/27/24

still burning

SIO15 2024: Topic 20 - Wildfires

2024 Wildfires – SoCal

Source: wikipedia

from Lecture 1

quiet until September

(NorCal had burned 400k acres by then)

then 3+ at once:

9/5 Line Fire (San Bernardino), 40k acres

9/8 Bridge Fire (LA/San Bernardino), 55k acres

9/9 Airport Fire (Orange), 25k acres

--- numbers have not changed significantly

however Bridge, Line fire still "burning"

(98% contained)

NEW: 11/6 Mountain Fire some 20K acres;
during Red Flag warning ("Santa Ana winds")
as cold front passed
at the time: *"winds are so fierce that fixed-wing planes are grounded"*
now 91% contained

SIO15 2024: Topic 20 - Wildfires

2024 Wildfires – SoCal

Source: wikipedia

cause:

9/5 Line Fire: arson

9/8 Bridge Fire: under investigation

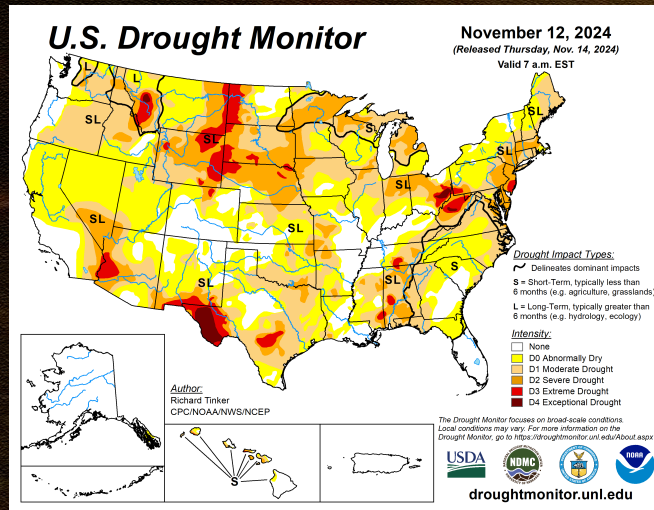

9/9 Airport Fire: equipment sparks

11/6 Mountain: under investigation

➤ buildings destroyed

SIO15 2024: Topic 20 - Wildfires

The 2003 Cedar Fire – Santa Ana

I-15 could not stop this fire!

Fiery paths

... largest wildfire in
modern CA history
273,000 acres
2232 buildings
cost: > \$ 1.3 B
14 fatalities (1 firefighter)
cause: signal fire

... until Dec
2017

Largest in SD until then: 1970 Laguna Mt.

SIO15 2024: Topic 20 - Wildfires

4 Years Later: 21 Oct 2007 – Santa Ana

SoCal summary:

12 fires

1300 homes lost

7 fatalities

910,000 people evacuated (more than for 2005 Katrina!)

8,000 firefighters

400,000 acres burned (**Witch Creek Fire 200,000**)

cause: downed powerline

Navy initially not involved because no civil fire observer

UCSD closed
all week

May 2014

20 fires

26,000 acres 68 structures/1 fatality

cause: arson, equipment

SIO15 2024: Topic 20 - Wildfires

Harris Fire

source: wikipedia

The 2003 Cedar Fire – Lessons Learned

things that needed work

- no-flight rule after dark
- different agencies communicate on different frequencies
- fire crews are 'on loan' were needed
- only 1-2 fire fighting helicopters (\$1.5 Mio or \$200k/month)
- fire fighting fee in rural areas?
- clear brush within 30 ft of buildings
- do not build into wildland/improve evacuation routes

The 2007 Witch Creek Fire – Lessons Learned

- modern roofs inadequate? (embers entering homes)
- add palm trees to 'bad' vegetation
- mass evacuation
- get military involved right away
- maintain powerlines/shut off power?

SIO15 2024: Topic 20 - Wildfires

2017 Thomas Fire – Montecito/Santa Barbara

source: Wikipedia

... largest wildfire in modern CA history
 282,000 acres
 1063 buildings
 cost: > \$ 2.2 B
 2 (1 firefighter)
 + 21 fatalities*
 Dec 4 – Jan 12
 cause: downed powerlines
 * from mudflow Jan 2018

... until Aug 2018

Peak of SoCal Fire Season:
OCTOBER
 -> this fire unusually late!

2018 SoCal Woolsey Fire

Smoke over Malibu

source: wikipedia

11/8 – 11/21
 96,949 acres
 295,000 evacuated
 1,643 buildings
 3 fatalities
 cost: \$ 6 B
 cause: faulty SCE
 equipment

Pepperdine
 University
 "shelter in place"

Agoura Hills
 HBO "Westworld"
 sets destroyed

SIO15 2024: Topic 20 - Wildfires

2017 Tubbs Fire – Santa Rosa

- 10/8-30; one of > 12 fires
- Napa/Sonoma/Lake County (4th year in a row)

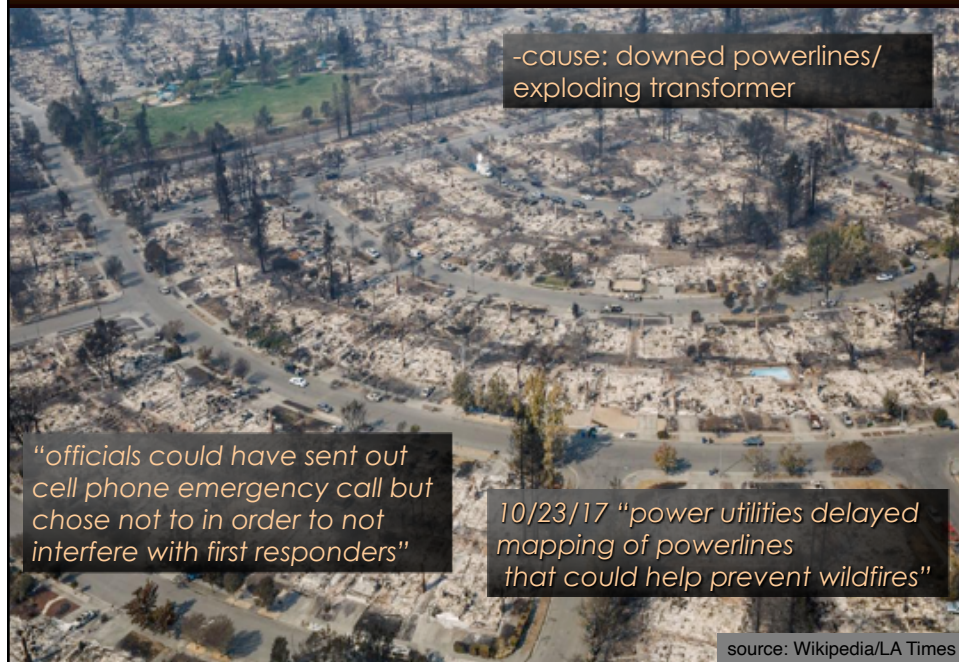

2017 Tubbs Fire – Santa Rosa

- Diablo winds (40mph)
- 36,807 acres
- 5,300 structures (of 8,900 total) (2,800 in Sta. Rosa/5% of housing)
- many wineries affected
- 22 fatalities (of 43 total)
- most destructive in CA history
- deadliest in CA history, until 2018

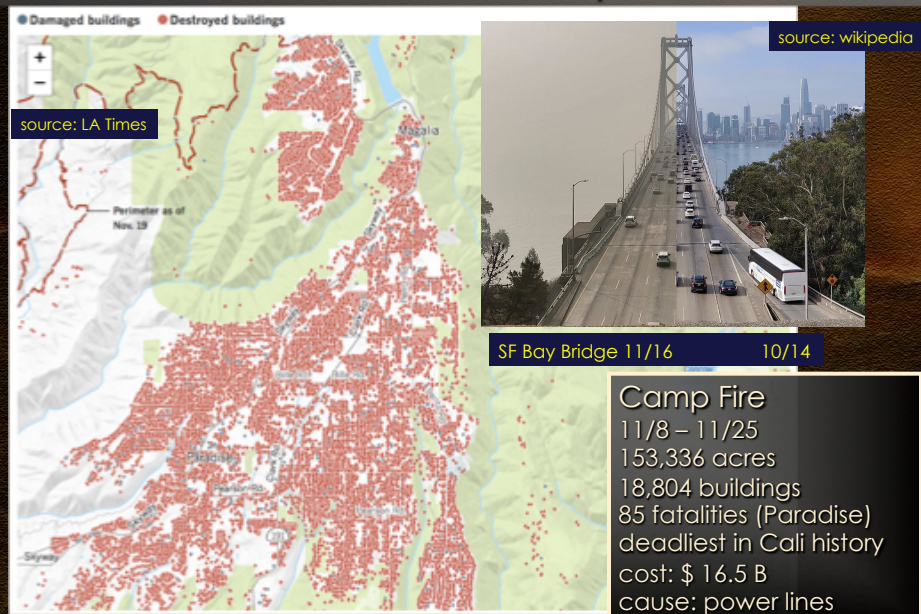

2017 Tubbs Fire – Santa Rosa

2017 Tubbs Fire – Humans and the Wildland

2018 NorCal Camp Fire

SIO15 2024: Topic 20 - Wildfires

Paradise – 5 Years later

11/8/23 S.D. Union Tribune

source: wikipedia

3/28/19 – first 2 building permits

population 2018: 26,000
2023: 10,000

*some moved to Yuma, AZ
living in RV purchased with
insurance money
some on fixed income, can't rebuild*

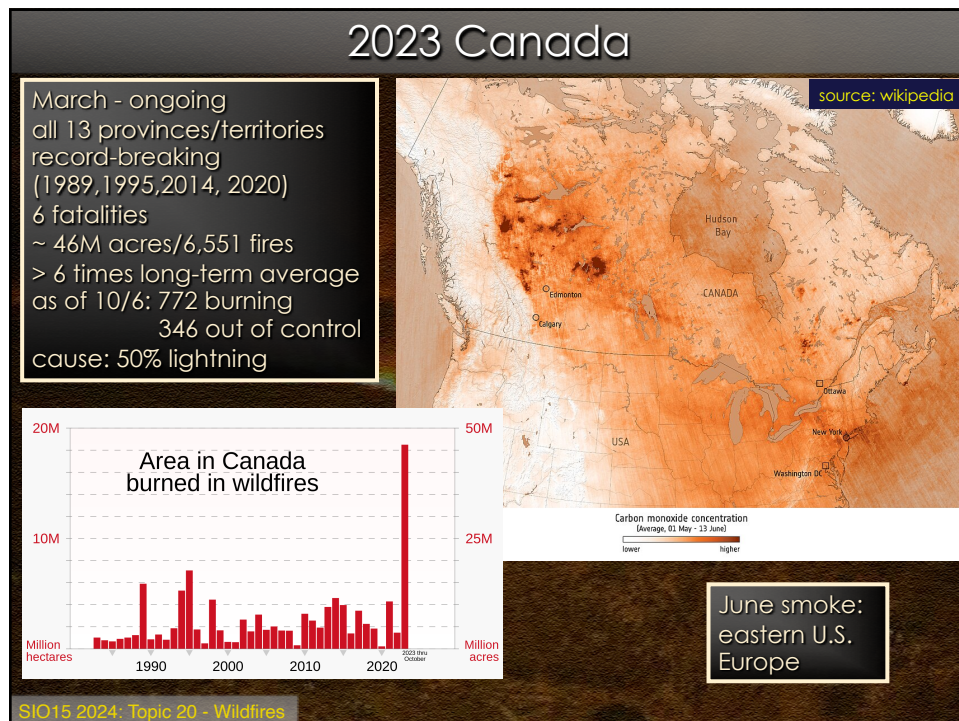

destroyed 11,000 homes
(90% of town)
2,500 have been rebuilt

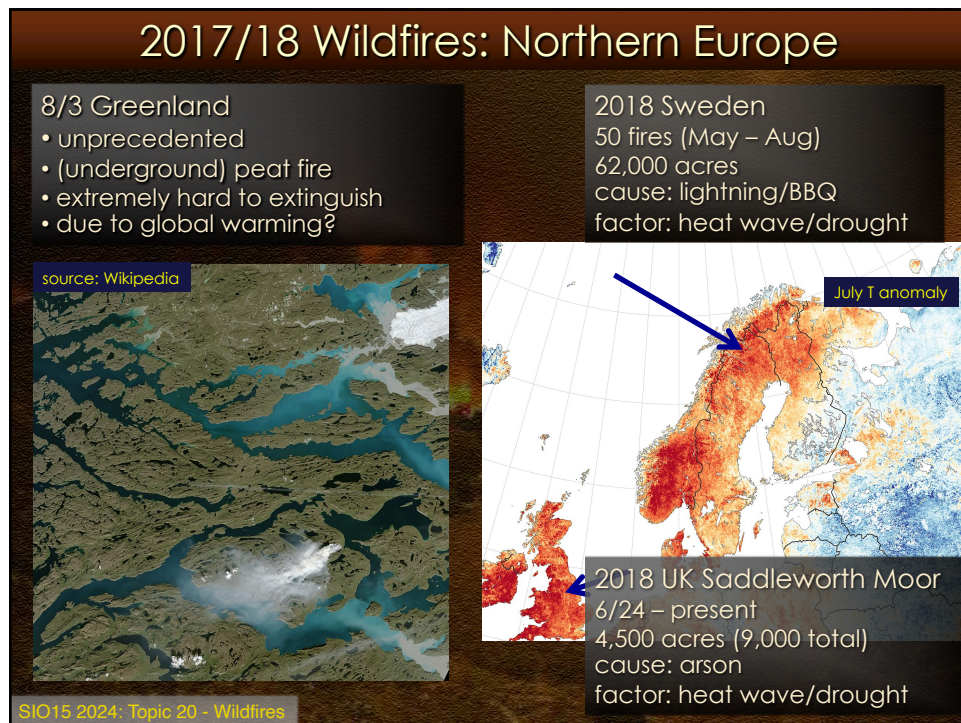

mayor:
by 2025 all powerlines underground
by 2026 all public roads repaved

*now power shut off during wind storms
home insurance dropped coverage in fire-prone areas
PG&E guilty in 84 manslaughter counts, filed for bankruptcy*

SIO15 2024: Topic 20 - Wildfires

2019 Wildfires: Amazon Rainforest

Bolivia 1/8 area of Brazil
but same acreage
burns!

source: Wikipedia

Jan – Nov ...

2,240,000 acres

- ✧ cause: slash-and-burn
in unusually dry season
- ✧ Brazil slow to accept
international help
- ✧ Bolivia

deforestation:
increases CO₂
reduces O₂
displaces indigenous people

SIO15 2024: Topic 20 - Wildfires

2019 Wildfires: Indonesian Rainforest

deforestation increasing
since 2010 despite 2011
moratorium

2007 WWF:
"Borneo has unique
species"

Borneo Feb – Nov ...
cause:
'illegal' slash-and-burn
for oil palms/timber/paper pulp
-> industrialized nations

source: Wikipedia

SIO15 2024: Topic 20 - Wildfires

2019 Wildfires: Indonesian Rainforest

[link to YaleE360](#)

Malaysia

Borneo (Kalimantan)

source: yaleE360
global forest watch

Indonesia
deforestation:
world's 3rd-worst
contributor to CO₂
after China, US

Sumatra lost 1/3 of its forest
between 1990 and 2010

Sumatra and Kalimantan
forests sit on peat
-> more CO₂ released

SIO15 2024: Topic 20 - Wildfires

2019 Wildfires: Indonesian Rainforest

tropical rainforests have most biodiversity on Earth

source: Wikipedia

Burning rainforest

- ✧ extinction of unique species
- ✧ displacement of indigenous people -> conflicts

orangutans live only in
Borneo and Sumatra

Oil Palm nursery - source: Greenpeace

Borneo orangutan
critically endangered

SIO15 2024: Topic 20 - Wildfires

2019 Wildfires: Indonesian Rainforest

tropical rainforests have most biodiversity on Earth

source: Wikipedia

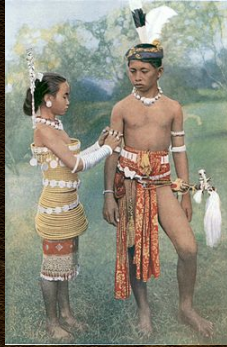

displacement of indigenous people -> conflicts

fight in 2001 claimed 1000s of lives

Dayak

vs

Madurese migrants

SIO15 2024: Topic 20 - Wildfires

2019 Wildfires: Indonesian Rainforest

Kuala Lumpur, Malaysia

source: Wikipedia

Countries affected:
Malaysia
Singapore
Brunei
Philippines

Countries also burning:
Thailand (for rubber trees)
Vietnam
Malaysia

SIO15 2024: Topic 20 - Wildfires

2019 Wildfires: Indonesian Rainforest – A way out

- ✧ reduce global demand for forest commodities
- ✧ produce bio diesel in a different way
- ✧ recycle more
- ✧ stronger global investment in conservation
(Norway had pledged \$1 B in 2011)*
- ✧ more support from industrialized nations
- ✧ stronger, legally binding language in moratorium
- ✧ stronger enforcement ?
- ✧ better education; better job opportunities

but

* Indonesia's 2015 income:
\$1.8 B pulp export
\$15 B palm oil
\$12.9 B coal export
