

| El Niño – Blessing to some, Disaster to others | |
|--|--|
| about every 5-7 years recurrence time complex (other ocean circulation; e.g. Pacific decadal oscillation) anomalously high SST along East Equatorial Pacific | |
| - particularly strong El Niños: 1956, 1982/83; 1997/1998; 2014/152;??- 2015/16 | |
| strong El Niños tend to bring wet season to SoCal (otherwise 50/50) 2015/16 was wet in NoCal only! may have global effects but affects Pacific region most strongly | |
| DROUGHT: WET: - Indonesia - central America - Australia - California? - high Andes (strong El Ninos only) | |
| SIO15 2024: Topic 21 - Long- and Short-term Climate | |
